Be "ELEPHANT" wise... fertilize!

Every bushel of grain that you deliver to the Elevator contains Phosphate that has been taken from your soil by growing crops.

Over a period of years the growing of crops has reduced the supply of available Phosphate in our soils. This plant element is essential for the development of a sturdy root system, high yields of good quality grain and early maturity of crops.

The application of a fertilizer high in Phosphate with the seed of cereal crops is **THE ONLY PRACTICAL WAY** of replacing this much needed Plant Food.

Increase your yields and your Profits by fertilizing your crops with Elephant Brand high analysis fertilizer.

Order **NOW** so that we can arrange to have the fertilizer you require in time for seeding.

Your Elephant Brand Agent

E. E. LANDRY

The Objects of Rotary

To encourage and foster the ideal of Service as a basis of worthy enterprise and, in particular, to encourage and foster:

1. The development of acquaintances as an opportunity for service.
2. High ethical standards in business and professions; the recognition of the worthiness of all useful occupations; and the dignifying by each Rotarian of his occupation as an opportunity to serve society;
3. The application of the ideal of service by every Rotarian to his personal, business and community life.
4. The advancement of international understanding, good will, and peace through a world fellowship of business and professional men united in the ideal of service.

AVERAGE COST of ELECTRIC POWER

TO PRAIRIE FARMERS

Is Today, Less Than One-Third
What It Was In 1935-39

This Didn't "Just Happen"

On The Other Hand..

The latest Dominion Bureau of Statistics index number of commodities and services used by prairie farmers means that the \$1.40 initial payment for No. 1 Northern wheat at Fort William is worth only $63\frac{3}{4}$ cents in 1935-39 dollars. At the average country elevator point it is worth approximately 55 cents a bushel on the same basis.

	1935-39	1956
*Farmer's Cost of Production	100	219.4

In other words, it now costs prairie farmers \$2.19 to buy what \$1.00 would buy in 1935-39.

*Dominion Bureau of Statistics Index Numbers of Commodities and Services Used by prairie farmers.

Alberta's Electric Utility Companies are proud of the fact that, on the average electric service today costs the Alberta farmer less than one-third of the cost in 1935-39. This didn't "just happen"! It took planning, efficiency and co-operation from the farmers.

CALGARY POWER LTD.
